An old sore or ulcer is not only a source of great bodily discomfort and pain, but the The Presbytery met on Saturday constant care, worry and anxiety over one of these malignant festering places produces an morning at 11 o'clock and remained in unhealthy state of the nervous system and the patient becomes morbidly sensitive, miserable sessior Sunday and Monday. An eating, lingering ulcer naturally fills the sufferer with fear while noting the daily growth of the sore, from which there is a slow but perpetual discharge of yellow or greenish watery matter, and feeling the dull, throbbing or sharp shooting pains

as the poison penetrates the tender tissues and reaches the bone.

All slow-healing, stubborn sores are dangerous. The same germ-producing, cancertainted blood is back of every sore or ulcer, large or small, that does not promptly and permanently heal; the little blister upon the lip or tongue, the warty growth or mole upon the cheek and other parts of the body, and the almost imperceptible.

Six years ago my long from the knee to the foot was one solid sore and the almost imperceptible to the foot was one solid sore and the little blood to the parts of the body, and the almost imperceptible to the foot was one solid sore and the little blood to the parts of the body.

About a year ago I wrote the Medical Department of your company to ascertain whether or not your S. S. S. would cure Cancer, as my wife had one on her breast, who created the second of the second of the second of the second of the plaster. Upon receipt of your letter, I bought five bottles and she commonced to take it, and in less than eight months she was cured. I did not write you until now because I wanted to see if the cancer would come back again. There are no symptoms or signs of a return and I write in order to let others know what a wonderful medicine your S. S. S. is. My wife used just 17% bottles, but the Cancer was cured after she had taken 12 or 14. I feel as though your S. S. S. could not be too highly recommended.

My case is a witness today as to what S. S. S. will do when taken regularly. I have gained 30 pounds. I write this to show the company my appreciation of their wonderful medicine, and I am ready to write a letter at any time to any one wishing further intermation.

J. B. TALBERT, Winona, Miss.

Washes, salves, nor anything else applied directly to the sore can do any permanent good; neither does the use of the knife or flesh destroying plaster cure, for local causes have nothing to do with these germ-breeding plague spots. You might cut out every particle of the diseased flesh and scrape the bone, but another sore would come. The germs or poison in the blood must be destroyed, the stream of sluggish, polluted blood purified and made strong before the healing process begins and the sore or ulcer can get well. S. S. S. is the only remedy known that can and does accomplish this. It cleanses and purifies the circulation, and when new, rich blood is carried through the little veins and arteries to the sore, it brings about a healthy healing around the edges, and a permanent and thorough cure is soon effected. S. S. S. not only

expels all impurities, but works a complete and radical change in the entire system by stimulating inactive organs, toning up the nerves, increasing the appetite, and aiding the digestion and assimilation of food, thus building up the weak and wasted constitution. S. S. S. is strictly and entirely a vegetable medicine, and no bad effects follow its use, and for this reason it is better than Mercury and Potash or other minerals, which not only ruin the stomach, but often produce most stubborn

and offensive sores themselves.

Prompt treatment should be given a sore or ulcer, no matter how small it may be, whether external or internal, for what you think a simple sore, may, in reality, be an undeveloped Cancer. Our physicians will gladly advise all who need their services, and those who write us will receive valuable suggestions regarding the treatment of their case free of charge,
